Actual energy savings will vary by model and product usage. 2 Replacement ink pack yields are estimated based on ISO/IEC 24711 testing in default mode with continuous printing. Ink pack yields vary considerably for reasons including images printed, print configurations, printing, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colors are used for printing and printer maintenance, and all colors must be installed for printing. For print quality, part of the ink from the included ink packs is used for printer startup and a variable amount of ink remains in the ink pack after the "replace ink pack" signal. For more information, visit www.epson.com/inkinfo 3 Actual savings will vary based on print tasks, print volumes and usage conditions. Savings comparison based on the cost of purchasing the packages of replacement ink and the cost of enough color toner cartridges to achieve the full page yield of the ink packs using manufacturers' online prices and yields for the highest capacity toner cartridges for best sellers on a regular basis. similar to featured color laser printers with speeds of 30 ppm or less based on available data of the industry as of March 2022 4 FPOT is measured on letter-size paper in accordance with ISO/IEC 17629.
